

Project No. 842009
Total budget:
10 534 935 Eur
Total EU contribution:
9 999 946,5 Eur
Duration:
2019 – 2021 (36 months)

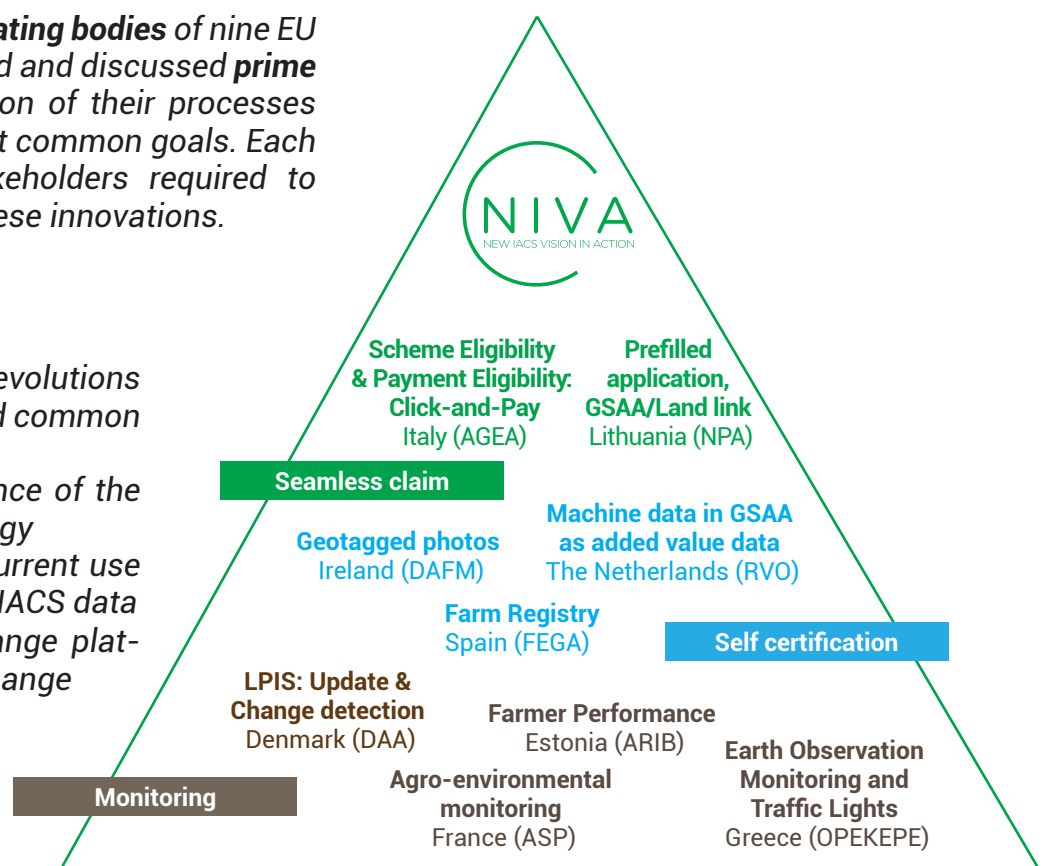

NEW IACS VISION IN ACTION

NIVA aims to modernise Integrated Administration and Control System of Common Agricultural Policy (IACS of CAP) by making efficient use of digital solutions and e-tools, by creating reliable methodologies and harmonised data sets for monitoring agricultural performance while reducing administrative burden for farmers, paying agencies and other stakeholders.

*Paying Agencies and coordinating bodies of nine EU Member States have identified and discussed **prime use cases** in digital innovation of their processes and systems, which represent common goals. Each use case involves the stakeholders required to demonstrate and evaluate these innovations.*

NIVA objectives:

- Integrate and reuse IACS evolutions based on open standards and common services
- Build on farmers' acceptance of the Smart Monitoring methodology
- Reduce the gap between current use and potential broader use of IACS data
- Create a permanent exchange platform for discussion and exchange

NIVA will achieve:

Technical innovations in IACS for its simplification and harmonisation, with respect to generic components

Organisational innovation through an innovation ecosystem

Methodological innovation in establishing common frameworks for impact assessment, interoperability and approaches to piloting and upscaling

A step forward to future policy governing systems

NIVA project creates and boosts an innovation ecosystem in which stakeholders (paying agencies, farmers, ICT solution providers, NGOs, etc.) participate and effectively share their experiences. This ecosystem aims to continue the collaboration after the project.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 842009
